- ▶ Loss Runs and Claims Analysis Reports with Graphing Capabilities
- ▶ Industry Benchmarking Data
- ▶ Marketing Materials
- ▶ Training Content

SOLUTIONS

Workers' Compensation

Our risk management consultants work closely with businesses to pro-actively prevent loss through innovative technology and a consultative approach.

We also offer claim cost reduction programs, supported by our industry leading claims adjusters, and a managed care approach to workers' compensation.

Return to Work Programs

Our return to work programs are a win-win situation for all involved. Designed to return injured healthcare employees to work as soon as they are medically able, these programs can reduce an employer's workers' compensation loss experience. They're also created to help employees gain self-esteem and avoid any negative financial impact due to lost time. Amerisure's return to work programs include:

- ▶ **Modified work** — the employee returns to his/her original job, but with duties modified to conform to restrictions placed on the job by the medical care provider.
- ▶ **Transitional work** — the employee temporarily performs another job that accommodates physical limitations.
- ▶ **Alternate work** — the employee is reassigned to another position or different type of work that accommodates current abilities.

COMMAND Coverage[®] For Healthcare

Our COMMAND Coverage provides broader property coverage and higher sub-limits in its basic form than most competitors. Enhancements include:

- ▶ Mechanical breakdown on processing equipment
- ▶ Broad computer coverage including limited international laptop coverage
- ▶ Money order and counterfeit paper currency cover
- ▶ Utility services
- ▶ Residents' personal effects
- ▶ Residents' money and security
- ▶ Emergency evacuation response
- ▶ Radioactive contamination
