

THE EVOLUTION OF FLEET ALLIANCE

Amerisure's Whole Risk Solution for Commercial Auto

Over the past decade Amerisure has been at the forefront of proactive solutions in the commercial auto market, as well as a premier partner in policyholder fleet safety technology access. Staying ahead of industry trends, such as nuclear verdicts and rate inflation, requires an innovative approach to ensure that we continue to offer our agency partners and policyholders the most dynamic whole risk solution for their commercial auto needs. Through the evolution of Amerisure's Fleet Alliance product and service suite, our customers and policyholders have access to data-driven tools and industry-proven guidance along with the expertise and second-to-none service of Amerisure.

Fleet Alliance offers the best fleet management, driver monitoring, and data analytics tools in the industry today—all with implementation and automation capabilities that save businesses time and provide them with practices to avoid costly liability litigation verdicts. Fleet Alliance also opens the door for businesses to enhance their fleet safety program architecture, giving them the ability to mitigate your commercial auto risk out on the road.

THE BEST OFFENSE

Using Fleet Alliance resources to take a proactive approach to commercial auto risk management is your organization's best stance to prevent commercial auto losses. An efficiently executed fleet safety program can identify at-risk drivers, curb unsafe behavior, recognize safe driving performances, and help an organization to hire and keep safer drivers in company vehicles, thus mitigating your risk of predatory auto claims outcomes.

With Amerisure Fleet Alliance we are excited to offer our policyholders the capability to build their best offense through:

- ▶ Telematics and AI dash cam options to monitor and coach your drivers (automation available).
- ▶ Vendor-based Motor Vehicle Record (MVR) solutions to simplify driver selection and monitoring.
- ▶ Data-aggregation for better risk assessment and fleet management.
- ▶ Program implementation guidance developed using the best practices of successful fleets.
- ▶ Access to our Amerisure Commercial Auto industry experts.

A SOUND DEFENSE

Fleet Alliance can help your organization to build a good defense against excessive litigation. When effectively implemented, fleet safety programs and proactive solutions can protect business owners from undue legal pressures, while helping to fight social inflation and its impact on commercial auto pricing and profitability. Amerisure embraces and promotes technologies and implementation strategies that can inform the defense of policyholder safe practices in the wake of an incident.

The tools and data offered through Fleet Alliance have been used to:

- ▶ Produce evidence, such as video footage, and data that may exonerate a driver and business.
- ▶ Prove that safety measures and standards were and are a staple in a business' fleet program.
- ▶ Reveal that an incident was not part of a pattern of bad driver behavior and lack of oversight—both of which fuel nuclear verdicts.

WINNING ON THE ROAD

Successful fleet program leaders can best pursue safety goals and optimize operations when they have a whole picture of their commercial auto risks. Fleet Alliance resources provides a winning line-up of tools that enable businesses to take a data-driven approach to safety that benefits everyone out on the road.
